Control Center Solutions

We offer a complete line of multi-dimensional metal bay and laminate style Control Center Furniture and accessories in a variety of configurations Please contact us for a free consultation.

The ACM3610T is configured as a multiple user console it is an efficient use of available space with an extension at mid point creating a “T” shaped pattern. The extension is used to accommodate a Lazy Susan.

The layout foot print is approximately 191“ x 40” with the “T” island extending out 36” from the front edge of the writing surface. This “In Line configuration” consists of 5 (dual) base cabinets. The central zone is a desk top work area, it has been configured at desk top height and does not have upper turrets. All other base cabinets have upper turrets (2 each 6 RU with one located at each end of the console and 6 each 3 RU. Cabinets and turrets are configured for optimum operator access, front and rear.

All cabinets are constructed using a combination of 11 and 14 gauge cold rolled steel, unitized/welded construction and are manufactured in compliance with ISO9001 standards and AS9100 certified quality.

The upper turrets are for operator accessible equipment mounting with easy to access rear doors. The 3RU turrets make excellent platforms for placing LCD type displays as shown in the product illustration.

The base cabinets selected for this configuration are five (5) at 42” wide x 24 “ deep. All cabinets are equipped with (dual) 19” EIA mounting rails with optional fixed or slide out shelving available as may be needed. Easy to access, lift out vented doors are standard, optional hinged doors are available.

The assembly comes equipped with an in cabinet vertical ground buss compliant to Motorola R56 standards.

The base cabinets are complimented with a laminate writing with rolled oak edges. All laminate products are constructed in compliance with NEMA LD3 Standards, using Marine grade ply board – available in a wide assortment of colors.

All cabinets are equipped with leg leveling devices, are pre-assembled and securely crated, ready for simple drop in place installation. Detailed drawings are sent with each console.

A wide variety of accessory items are available to compliment this configuration.

Please note that the accessory items shown (LCD monitors – special panels etc) in the product illustration are not included with the product, they have been shown to help with the preliminary conceptual planning.

The illustration displays the ACM3610T with optional industrial grade under the surface file cabinets.
