Control Center Solutions

We offer a complete line of multi-dimensional metal bay and laminate style Control Center Furniture and accessories in a variety of configurations. Please contact us for a free consultation.

The **ACM3650** is configured for a dual operator position control console.

The layout foot print is approximately 107" x 40". This configuration consists of 3 Legacy Line base cabinets with upper turrets (2 each 9RU and 2 each 3RU) configured for optimum operator access with an open surface for an ergonomic comfort zone in the middle .

All cabinets are constructed using a combination of 11 and 14 gauge cold rolled steel, unitized/welded construction and are manufactured in compliance with ISO9001 standards and AS9100 certified quality.

The 3RU Turrets are for operator accessible equipment mounting with easy to access rear doors, they make excellent platforms for placing LCD type displays as shown in the product illustration.

The base cabinets selected for this configuration are sized one at 21" wide x 24" deep, and three at 42" wide x 24" deep. All cabinets are equipped with 19" EIA mounting rails with optional fixed or slide out shelving available as may be needed. Easy to access, lift out vented doors are standard, optional hinged doors are available.

The assembly comes equipped with an in cabinet vertical ground buss compliant to Motorola R56 standards.

The base cabinets are complimented with a laminate writing surface with rolled oak edges. This laminate product is constructed in compliance with NEMA LD3 Standards, using marine grade ply board – available in a wide assortment of colors.

All cabinets are equipped with leg leveling devices, are pre-assembled and securely crated, ready for simple drop in place installation. Detailed drawings are sent with each console.

A wide variety of accessory items are available to compliment this configuration.

Please note that the accessory items shown ( LCD monitors – special panels etc) in the product illustration are not included with the product, they have been shown to help with the preliminary conceptual planning.

The illustration displays the ACM3650 with an optional industrial grade under the surface file cabinet.
