

Desktop Cabinet ACP-2714A

Standard American Wireless products have been configured to support the Motorola MCC-7500 Series Dispatch Console. The Desktop workstation packaging using the ACP-2714A is intended to reduce workstation clutter.

Before ACP2714 Packaging

After ACP2714 Packaging

The standard MCC-7500 Desktop Console configuration shown *above left* (A) includes; the LCD System Display, Four (4) Desktop speakers, the GPIOM (*General Purpose Input/Output Module*), a Desktop Microphone, the GPIOM Power Supply, a Headset, and the CPU keyboard. The System CPU, and optional Transmit foot switch are not shown. The same MCC-7500 equipment is *shown above right* (B) using the ACP-2714A to organize the workstation components. Four (4) intelligent speakers (ISP) are panel mounted in a RU2 Desktop cabinet(DTC) which also houses the GPIOM, power supply and interface cables. The cabinet is used as a platform for the LCD system display. The system CPU and optional Transmit foot switch are not shown. The DTC is manufactured compliant to stringent NEMA LD3 standards and is available in a variety of laminate colors.

Shown at the left is an ACM-3151 industrial grade 24" transmit foot switch, ergonomically designed for the 24-7 dispatch environment.

Legacy Line

MCC-7500 Dispatch Console Accessories

The Model ACP-2714A is a Desktop cabinet (DTC) (20.5"W x 18" D x 5" H) which includes four (4) intelligent speaker modules mounted on a (3.5" x 19"EIA) panel. The speaker modules are intelligent (ISP) with individual volume controls, mute switch, and a bicolor LED to display operational status.

- **FLASHING GREEN** indicates that audio is present.
- **AMBER** indicates that the speaker is muted (-22dbm).
- **FLASHING AMBER** indicates that the speaker is muted but audio is present.

The ACP2714A includes a dynamic Gooseneck Microphone and a transmit push to talk (PTT) button on the front of the panel. Mounting Hardware and interconnecting cables are included for installing the GPIOM and connecting it to the dedicated speakers and panel microphone. The ACP-2714A is designed to operate using either the GPIOM Power supply or a dedicated power supply which is furnished with the configuration. This option is "plug and play" no wiring changes are needed.

Pictured right is a Rear view of the AWI ACP-2714A showing the GPIOM mounting and cable connections.

Pictured left is an AWI Ergonomic Keyboard tray with Transmitter push to talk (PTT) switch .
